INDIAN WELLS CITY COUNCIL
December 4, 2025

To:	City Council
From:	Public Works Department
Prepared by:	Dina Purvis, Interim Public Works Director
Subject:	**Safer Streets Speed and Volume Study Results**

RECOMMENDED ACTIONS:

Council **DISCUSSES** the results of the Speed and Volume Study conducted on four streets identified in the Safer Streets Initiative and provide directions to staff regarding potential implementation of speed cushions or other traffic calming measures; and

FINDS the action exempt from the provisions of the California Environmental Quality Act (CEQA) pursuant to California Public Resources Code section 21080.20, and Section 15301, Class 1 (c) of Title 14 of the California Code of Regulations.

DISCUSSION:

The Safer Streets Project is being designed for the streets of Fairway Drive, Eldorado Drive, Rancho Palmeras and Cook Street. The underlying goal of Safer Streets is to improve road safety for non-vehicular travel and reduce vehicular speed. At the June 10, 2025 City Council meeting, the Council approved moving forward with the design of the following.

Phase I (Fairway Drive and Eldorado Drive):

- **Fairway Drive**
    - Construct a 6' meandering sidewalk along the south side of Fairway Drive for pedestrian safety.
    - Sidewalk to be constructed out of a colored permeable concrete that looks like decomposed granite versus a conventional concrete sidewalk.
    - Stripe Fairway Drive to accommodate one lane of traffic in each direction, provide a combination 8' bicycle/golfcart lane in each direction (marked in white paint only), and maintain street parking on the north side of Fairway Drive.

- **Eldorado Drive**

    - Striping Eldorado Drive to provide a combination 8' bicycle/golfcart lane in each direction (marked in white paint only).
    - Addition of a meandering sidewalk from Highway 111 to Camino Cielo on the west side of Eldorado to the entrance of the Sundance community to mirror the Montelena Community sidewalk.
    - Examine the addition of a northbound right turn pocket at Highway 111.
    - Install crosswalks at Fairway Drive crossing each leg of the intersection to Fairway Park. Additional research is needed to confirm whether these crosswalks can be installed, as they do not connect pedestrian improvements to non-pedestrian improved areas.

Phase II (Rancho Palmeras and Cook Street):

- **Rancho Palmeras**

    - Construct a left turn pocket on southbound Rancho Palmeras at the Camino de Plata intersection.
    - Construct a right turn pocket on northbound Rancho Palmeras at the Camino de Plata intersection.
    - Stripe Rancho Palmeras to accommodate one lane of traffic in each direction and a combination 8' bicycle/golfcart lane in each direction.

- **Cook Street**

    - Implement a road diet and add 6' meandering sidewalks on both sides of Cook Street.
    - Striping to accommodate one lane of traffic in each direction and provide a combination 8' bicycle/golfcart lane in each direction (marked in white paint only).
        - Final design would include a two-lane to one-lane transition in both north and southbound lanes near Highway 111.
    - Further traffic analysis needs to be conducted on additional Planning Commission recommendations for traffic signage on Cook Street and no right turn on red at Highway 111 onto Cook Street.
    - Eastbound Highway 111 to southbound Cook Street right turn restriction – No turn on Red

Also at the direction of the City Council during the June 10, 2025 Council meeting, Staff was directed to bring back another staff report explaining speed cushions and the cost of installation. Subsequently, at the July 2025 meeting, staff received direction to engage a professional traffic engineering firm to perform speed and volume analysis on the four streets designated under the City's Safer Streets Project, and to bring the results first to

the Public Safety Committee and then to City Council for discussion. Council's direction was to collect this data and present it a future City Council meeting to determine if the data has any impact on the previously approved design elements of Safer Streets, including the need for speed cushions.

The majority of the data was collected during the month of September 2025. Similar data has previously been collected in February and March of earlier years. Understanding what is occurring at a minimum, year-round, allows an analysis of conditions from lowest to peak levels of road use. Data collection was conducted using pneumatic air tubes across the study locations to measure:

- Average daily traffic volumes
- Vehicle speeds, including 85th percentile speeds
- Frequency of speed limit violations

The data collection for each segment is below:

Fairway Drive @ Azure Hills (30mph)

- Average Daily Traffic – 2157 vehicles/day
- 85th percentile speed – 39 mph
- % of vehicles over posted speed limit
    - East Bound (EB) - 80%
    - West Bound (WB) -75%

Fairway Drive near Williams (30mph)

- Average Daily Traffic – 1846 vehicles/day
- 85th percentile speed – 36 mph
- % of vehicles over posted speed limit
    - EB - 61%
    - WB -57%

Cook Street (35mph)

- Average Daily Traffic – 3153 vehicles/day
- 85th percentile speed – 44 mph
- % of vehicles over posted speed limit
    - North Bound (NB) - 70%
    - South Bound (SB) - 54%

Rancho Palmeras (35mph)

- Average Daily Traffic – 593 vehicles/day
- 85th percentile speed – 35 mph
- % of vehicles over posted speed limit
    - NB - 15%
    - SB -17%

Eldorado (30mph)

- Average Daily Traffic – 1821 vehicles/day
- 85th percentile speed – 41 mph
- % of vehicles over posted speed limit
    - NB - 91%
    - SB -82%

Cielito (35mph)

- Average Daily Traffic – 156 vehicles/day
- 85th percentile speed – 27 mph
- % of vehicles over posted speed limit
    - NB - 31%
    - SB -21%

Key findings include:

- Cook Street registered the highest traffic volume (18,855 vehicles over 7 days) but not the greatest percentage of vehicles exceeding the posted speed limit (An average of 62% of drivers over the posted speed limit of 35, both north and south bound). 1350 vehicles (7%) were over 45 mph. During last season, Cook Street had a 24 hour ADT volume total of 5,703, compared to the off season 24 hour ADT volume of 3196 on the highest day.
- Eldorado Drive had a moderate traffic volume (10,614 vehicles over 7 days), but had the highest speeding frequency (An average of 87% of drivers over the posted speed limit of 30, both north and south bound). 529 vehicles (4%) were over 45 mph. During last season, Eldorado Drive had a 24 hour ADT volume total of 3,512, compared to the off season 24 hour ADT volume of 1,902 on the highest day.
- Fairway Drive West had a higher traffic volume (12,520 vehicles over 7 days) and a high speeding frequency (An average of 78% of drivers over the posted speed limit of 30, both east and west bound). 232 vehicles (1%) were over 45 mph. During last season, Fairway Drive West had a 24 hour ADT volume total of 3,549, compared to the off season 24 hour ADT volume of 2,216 on the highest day.
- Fairway Drive East had a slightly lower traffic volume than Fairway Drive West (10,560 vehicles over 7 days) with a lower speeding frequency (An average of

60% of drivers over the posted speed limit of 30, both east and west bound). 63 vehicles (less than ½ %) were over 45 mph. During last season, Fairway Drive East had a 24 hour ADT volume total of 3,478, compared to the off season 24 hour ADT volume of 1,900 on the highest day.

- The remaining study streets showed low traffic volumes with lower rates of speed violations in comparison.
- Enforcement presence did not show a measurable reduction in speeds.

These findings provide a data-driven basis for evaluating the need and urgency for further traffic calming interventions on each corridor.

Staff recommendations:

- Rancho Palmeras - Based on the data collected, the traffic engineer did not recommend any additional changes to the proposed design concepts for Rancho Palmeras.
- Fairway Drive - Based on the data collected, the traffic engineer did not recommend any additional changes to the proposed design concepts for Fairway Drive. Speed cushions on this arterial roadway were not recommended.
- Cook Street – Based on the data collected, the traffic engineer did not recommend any additional changes to the proposed design concepts at this time. A reevaluation of speed cushions or other traffic calming amenities can be considered after the completion of the proposed project improvements.
- Eldorado Drive – Based on the data collected, the traffic engineer believes the proposed design elements (e.g., re-stripping) are likely to have a minimal effect in reducing speeds on Eldorado Drive once completed. The traffic engineer recommends additional traffic calming measures to be considered in this segment to further reduce speeds (e.g., narrowing of street) on Eldorado Drive. This will be presented when 30% of design plans are brought back for future Council discussion.

Public Safety Committee Recommendations:

The Public Safety Meeting previously scheduled on October 21, 2025 was rescheduled to November 5, 2025. At the November 5th meeting, the Public Safety Committee received the newly collected data and viewed the data collection sheets. The Public Safety Committee also received data from the speed radar sign on Fairway, although that data is not shared here, as it does not break down direction. The Public Safety Committee received the collected data and did not elect to move forward with speed cushions at that time.

CITY COUNCIL STRATEGIC GOAL:

The Safer Streets Project is one of the City Council's Strategic Goals, and this year was part of Goal #6, Investing in Infrastructure and Amenities. As part of this goal, staff were asked to study speed cushion feasibility through the application of data analysis of existing conditions.

OPTIONS:

The City Council has the following options.

1. Accept the study results and monitor:
   Wait for the planned Safer Streets physical improvements (e.g., striping, signage, narrowing) to be installed and observe whether speed naturally decreases post-implementation.
2. Direct staff to install speed cushions:
   Authorize the immediate installation of speed cushions on the most problematic streets (e.g., Cook Street , Fairway Drive and Eldorado Drive), and monitor post-installation impacts on traffic flow and public feedback. Cost to install is approximately $84,000.
3. Provide alternative direction:
   Council may propose a phased approach, pilot program, or request additional public outreach or engineering analysis before proceeding

FISCAL IMPACT:

The Fiscal Impact will be dependent on the direction of the City Council. If Option 2 is selected, the cost to install speeds cushions on Eldorado is estimated to be $21,000, $21,000 on Cook Street, and $42,000 on Fairway Drive.

CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA):

This action has been reviewed in accordance with the authority and criteria contained in the California Environmental Quality Act (CEQA), the State and local CEQA Guidelines, and the environmental regulations of the City. The City, acting as Lead Agency, has determined that Under California Public Resources Code section 21080.20, CEQA does not apply to active transportation plans, pedestrian plans and bicycle transportation plans. Furthermore, the proposed improvements within the existing street rights-of-way are categorically exempt under CEQA in accordance with Section 15301, Class 1 (c) of Title 14 of the California Code of Regulations, for Existing Facilities, including streets, sidewalks, gutters, bicycle and pedestrian trails, and similar facilities.
